

## **Kingsport MPO Annual Listing of Obligated Projects Fiscal Year 2011**

The Kingsport MPO, as required by the Safe, Accountable, Flexible Transportation Equity Act- a Legacy for Users (SAFETEA-LU), develops and regularly updates the Transportation Improvement Program (TIP). The TIP documents how federal funds will be used towards highway and public transportation improvements within the urban area. The projects included in this plan are within the Kingsport MPO planning boundary which is defined by the 2000. All of the projects in this TIP are derived from the 2030 Long Range Transportation Plan (LRTP).

The Tennessee Department of Transportation (TDOT) and the Virginia Department of Transportation (VDOT) choose and submit highway or state route improvements projects that are funded using various funding sources including National Highway System, High Priority Projects, Interstate Maintenance, etc. The MPO, in coordination with State and Federal agencies, has the authority to choose projects for inclusion into this plan using Surface Transportation Program (STP) funds.

The SAFETEA-LU transportation act requires an annual listing of projects be published or otherwise made available by the cooperative effort of the State, transit operator and metropolitan planning organizations for public review. The report shall include a listing of projects of which Federal funds have been obligated in the preceding year, including investments in pedestrian walkways and bicycle transportation facilities.

### **Summary of Terms**

Programmed funds: Funds that have been identified in the TIP for a particular project and phase.

Obligated funds: Funds that have been committed to the project phase by the Federal government.

Programming funds for a project is similar to writing a check from a banking account for the amount of the project phase listed in the TIP. The funds for a project phase are considered obligated when the check is cashed. Obligating funds for a project requires several steps at the state and federal government but the funds are officially declared obligated by the federal government. Therefore, due to delays in project development, project phases can have a check written for them but funds may never be "cashed" to the project. This project would remain programmed in the TIP but would not be obligated. The projects in this report refer to projects that have specific funds obligated for a particular phase of the project.
